¹ A/A spring fitment may be needed on some vehicles for trimming purposes.

² Can be used on front application only

³ Shock selection N89/N95 for medium and N89 for heavy applications applies to vehicles up to 1984 due to a 16mm eye and shorter open and closed lengths. Post 1984 vehicles with 19mm eye use N85/N94 for medium applications and N85 for heavy applications.

⁴ OMEU52 is required when fitting CS009FA/B or CS008FA/B springs because original U bolt will foul drag link on full droop. Refer to OME Fitting Manual.

⁵ Pick up models may require an FK03 (saddle correction plates) if the spring seats are distorted. FK10 must be fitted to all models used continually off road. Refer to OME Fitting Manual.

⁶ Extra Leaf can be fitted for heavier constant load carrying ability.

⁷ A trim spacer may be required to trim vehicle. Only to be used on rear springs. Important: Install leaf springs with military wrap at the fixed end.
